INDEX TO VOLUME LVIII

Abernathy, Theodore J., and others: Pneumothorax therapy in lobar pneumonia..... 35

Barker, Lewellys F.: Differential diagnosis of disseminated sclerosis from other forms of multilocular encephalomyelopathy. Comments upon recent ideas concerning etiology and treatment..... 335
Blackman, S. S. Jr.: Intranuclear inclusion bodies in the kidney and liver caused by lead poisoning..... 384
Bladder, control of, A clinical study of, by the central nervous system..... 89
Bliss, Eleanor A., and others: Experimental production of whooping cough in chimpanzees..... 286
Book Reviews..... 134, 266, 381, 428
Brown, J. Howard, and others: The experimental production of whooping cough in chimpanzees..... 286

Calcium and phosphorus studies. XII. Six years' clinical experience with viosterol in the prevention and treatment of rickets, tetany and allied diseases..... 137

Dandy, Walter E., and Frederick Leet Reichert: Polyuria and polydipsia (diabetes insipidus) and glycosuria resulting from animal experiments on the hypophysis and its environs..... 418
Dees, John E., and others: A clinical study of the control of the bladder by the central nervous system..... 89
Dinitrophenol poisoning, An unusual case of..... 378
Duff, G. Lyman, and Arnold R. Rich: Experimental and pathological studies on the pathogenesis of acute haemorrhagic pancreatitis..... 212
Duff, G. Lyman, and Charles W. Wainwright: Monocytic leukemia..... 267

Edema, Nutritional, in the dog. III. Salt and the augmentation of tissue fluid..... 1
Eichert, Herbert: An unusual case of dinitrophenol poisoning..... 378
Ellsworth, Read McLane, Memorial notice..... 383

Fever, obscure, Diagnosis of, I. The diagnosis of unexplained, long-continued, low-grade fever..... 109
II. The diagnosis of unexplained high fever..... 307
Ford, Frank R., and Frank B. Walsh: Clinical observations upon the importance of the vestibular reflexes in ocular movements. The effects of section of one or both vestibular nerves..... 80

Goettsch, E., and others: Nutritional edema in the dog. III. Salt and the augmentation of tissue fluid..... 1

Hamman, Louis, and Charles W. Wainwright: The diagnosis of obscure fever...109, 307
Hepatic damage, experimentally produced, Morphologic changes in the blood associated with..... 343

Hesser, Frederick H., and others: A clinical study of the control of the bladder by the central nervous system 89
Holt, L. Emmett, Jr., and others: The experimental production of whooping cough in chimpanzees 286
Hopper, Katherine B., and David H. Shelling: Calcium and phosphorus studies. XII. Six years' clinical experience with viosterol in the prevention and treatment of rickets, tetany and allied diseases 137
Horsfall, Frank L. Jr., and others: Pneumothorax therapy in lobar pneumonia 35
Hypophysis and its environs, Polyuria and polydipsia (diabetes insipidus) and glycosuria resulting from animal experiments on the 418

Johns Hopkins Medical Association, Meeting of, Programs 261

Kemp, Jarold E., and William C. Menninger: The influence of inadequate treatment of early syphilis on the incidence and incubation period of neurosyphilis 24

Langworthy, Orthello R., and others: A clinical study of the control of the bladder by the central nervous system 89
Lead poisoning, Intranuclear inclusion bodies in the kidney and liver caused by 384
Leukemia, Monocytic 267
Lewis, Lloyd G., and others: A clinical study of the control of the bladder by the central nervous system 89
Long, Perrin H. Jr., and others: The experimental production of whooping cough in chimpanzees 286

MacLeod, Colin M., and others: Pneumothorax therapy in lobar pneumonia 35
Medicine, present and future of, The influence of the past on the 65
Menninger, William C., and Jarold E. Kemp: The influence of inadequate treatment of early syphilis on the incidence and incubation period of neurosyphilis 24

Neurosyphilis, incidence and incubation period of, Influence of inadequate treatment for early syphilis on the 24
Nicholson, William M.: Observations on the pathological changes in suprarenalectomized dogs with particular reference to the anterior lobe of the hypophysis. A comparison with Addison's disease 405

Ocular movements, Clinical observations upon the importance of the vestibular reflexes in, The effects of section of one or both vestibular nerves 80

Pancreatitis, acute haemorrhagic, Experimental and pathological studies on the pathogenesis of 212
Pneumonia, lobar, Pneumothorax therapy in 35

Reeves, E. B. and others: Nutritional edema in the dog. III. Salt and the augmentation of tissue fluid 1
Reichert, Frederick Leet, and Walter E. Dandy: Polyuria and polydipsia (diabetes insipidus) and glycosuria resulting from animal experiments on the hypophysis and its environs 418

Rich, Arnold R., and G. Lyman Duff: Experimental and pathological studies on the pathogenesis of acute haemorrhagic pancreatitis..... 212
Rich, Arnold R., and others: Experimental production of whooping cough in chimpanzees..... 286
Robinson, G. Canby: The influence of the past on the present and future of medicine..... 65

Sclerosis, disseminated, Differential diagnosis of, from other forms of multilocular encephalomyelopathy. Comments upon recent ideas concerning etiology and treatment..... 335
Shelling, David H., and Katherine B. Hopper: Calcium and phosphorus studies. XII. Six years' clinical experience with viosterol in the prevention and treatment of rickets, tetany, and allied diseases..... 137
Shumacker, H. B. Jr., and M. M. Wintrobe: Morphologic changes in the blood associated with experimentally produced hepatic damage..... 343
Suprarenalectomized dogs, Observations on the pathological changes in, with particular reference to the anterior lobe of the hypophysis. A comparison with Addison's disease..... 405

Wainwright, Charles W., and Louis Hamman: The diagnosis of obscure fever....109, 307
Wainwright, Charles W., and G. Lyman Duff: Monocytic leukemia..... 267
Walsh, Frank B., and Frank R. Ford: Clinical observations upon the importance of the vestibular reflexes in ocular movements. The effects of section of one or both vestibular nerves..... 80
Weech, A. A., and others: Nutritional edema in the dog. III. Salt and the augmentation of tissue fluid..... 1
Whooping cough, Experimental production of, in chimpanzees..... 286
Wilmer, William Holland, Memorial Notice..... 333
Wintrobe, M. M., and H. B. Shumacker, Jr.: Morphologic changes in the blood associated with experimentally produced hepatic damage..... 343
